INTRODUCTION:

Poushali Electronics make real time information DISPLAY BOARD for Industrial Process /Parameter to measure and monitor Process, Flow, Pressure, Level, Temperature ,analytic parameters or any other parameters. This is very useful as the display gives us an instantaneous readout of the process . Electronic displays also come in both analog, symbol and digital forms. The important parameters to be considered in electronic displays are the number of characters to be displayed, the type of characters like alpha numeric, special characters, the illumination color, the input voltage, the power consumed and the distance from which people would be viewing the display from, etc.

It is having RS232 port to change the data from computer.

Poushali Electronics can help you to develop an attractive and functional digital menu board for

***PRODUCTION**

Advising employees about company targets and production levels will provide motivation and increase productivity.

***PROCESS PARAMETER**

* Welcome guests to their establishment and offer up to date information.
